ABOUT US

We are an award-winning company offering high-quality driveway and landscaping solutions throughout Hertfordshire.

This family business has been installing, paving, landscaping and related products previously listed for many years.

Our staff are friendly, helpful and professional, our installations are second to none, hence a lot of our work is from direct recommendations. Amwell places great emphasis on customer care, which is reflected by many satisfied customers leaving positive reviews on *trustatrader.com*.

We are very happy to provide free written quotations with a scaled plan, for projects small to large.

BLOCK PAVING

Block paving for driveways is a popular choice due to the many different colours and almost countless different designs that can be created to suit and enhance each individual property's appearance.

The use of quality materials and correct preparation is required to ensure not only an attractive, but also a long and hard wearing area.

If properly installed, block paving is easy to maintain and repair, if access to underground services are ever required; it's easy to reform by just replacing the existing blocks leaving no trace of any repair or disturbance.

We also offer a service for our customers of 'Enhancing block paving using acrylic sealer' this makes cleaning much easier and future weed and algae growth minimal.

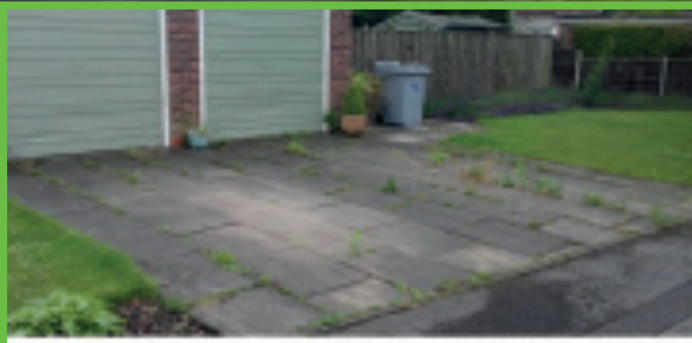

TARMAC

You can rest assured your Tarmac driveway will be in professional hands and the work will be completed in a timely manner to the best standards.

Tarmac is a popular and cost-effective material to use when constructing your new driveway, or other areas. Durable and hardwearing, it is flexible to use and normally has lower installation costs compared to alternative driveway materials.

As a family business, we stand by our quality of workmanship and reliability of our service, holding great pride in our great customers' reviews. All our team have an extensive knowledge when it comes to laying a good, long-lasting, tarmac driveway.

Tarmac drives are considered a cost-effective way to get that brand new driveway. Also known as 'Bitmac' due to the process no longer involving 'tar', it is used on a vast majority of the UK roads, proving how durable it really is.

RESIN DRIVEWAYS

Similar to the Resin Bond driveways we offer, Resin Bound uses a system of resin and stones to give areas a natural looking gravel finish. However, unlike Resin Bond, Resin Bound has a smooth finish and can be water permeable if laid on-top of a suitable base-layer, which can help to reduce the risk of flooding.

Proving to be a popular driveway solution, resin bound surfacing is a mixture of naturally sourced stones and a strong, durable, UV resistant resin. Once the stones and resin are mixed together, it is poured and trowelled onto the driveway, or other areas, to create a strong and smooth finish. Our team have years of experience designing and installing Resin Bound driveways. Call us today to find out how we can help.

Resin Bound gives you the choice of a wide variety of designs and colours to help design your driveway however you want.

PAVING SLABS & NATURAL STONE

A well designed patio can be a great addition to any garden landscape. The experienced team at Amwell can help you choose from a wide variety of materials and styles for your patio to compliment your home.

Whether you want a new patio for an outside dining area, pathway, or even a design feature, our durable range of paving slabs are ideal to transform any outside space, no matter how big or small.

The workmanship from our team of paving experts is second to none. A beautiful inviting patio can be a great centerpiece for your garden, bringing the outside in and making your indoor space appear bigger. If it's a modern, traditional or contemporary design you are looking for, we can offer your new patio in a variety of materials, styles, textures, and colours to suit your budget.

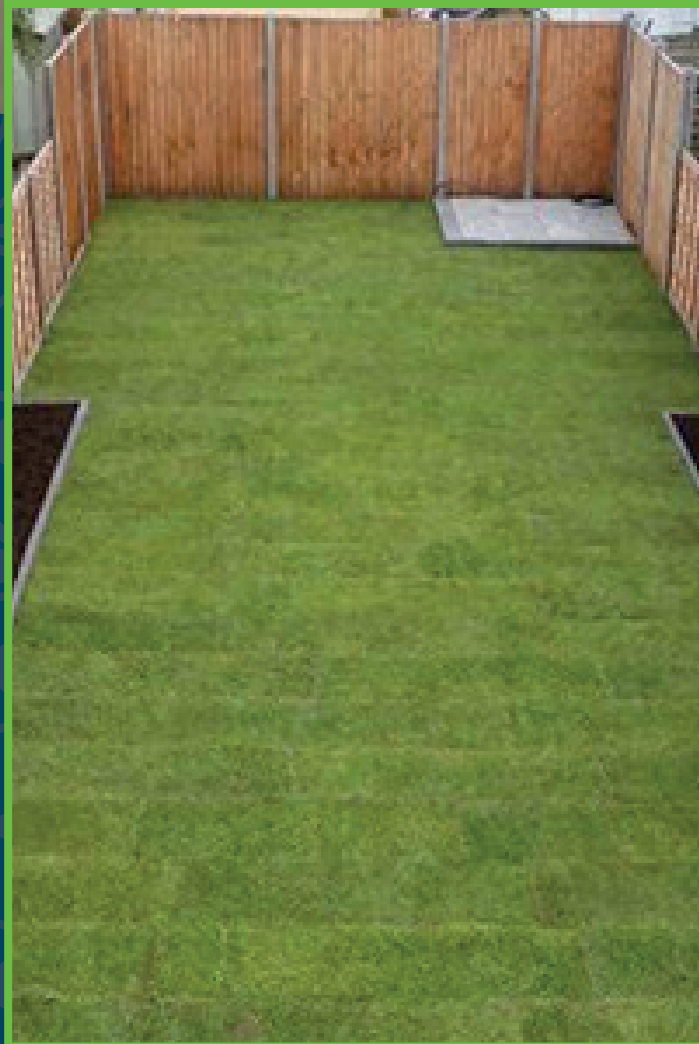

LANDSCAPING

Hard landscaping allows the creation of great features throughout your garden with the use of solid building materials such as brick and stone. Popular Hard Landscaping features include paving, fountains, shingle pathways, and stone features. Hard Landscaping can turn an ordinary garden into something special and should be a consideration for anyone wanting to improve the overall look and feel of their garden. If you would like to discuss our Hard Landscaping services or would like to receive a free quote, contact us today.

Soft Landscaping can often be seen as the most important part of the garden, soft landscaping includes all of the plants. Everything from trees to flowers, grass, and soil to help bring the structure of your garden together. Used in the right way, soft landscaping can add a new dimension to your garden, adding life and colour to any environment.

FENCING

The image shows a close-up of a wooden fence. The top section features a trellis design made of diagonal wooden slats. Below this, there are vertical wooden panels. The wood is a light, natural color with visible grain and knots.

We can supply and fit all your wooden fencing needs. From fence posts, trellis panels, gates and more. Contact us for a free quote to see how we can help with your project.

Wooden fencing is a great way to improve the look, increase security, or add a bit of privacy to your garden. We can offer a wide range of shapes, designs, and sizes dependant on your fencing needs. Our fencing can also be stained or painted to further enhance the look and compliment the rest of the properties appearance.
